

CIRQUE Easy Cat - Individual external Touchpad

Touchpad with two buttons.

Description

Simply touch and go!

- Operating your PC with the CIRQUE Easy Cat is as simple as that.
- The function of the buttons on mouses can be released with the installed keys or by tapping on the control surface of the [Touchpad](#), which is for this reason divided into two areas. These areas can be easily made out by their different surface structures.
- The CIRQUE Easy Cat is hardly susceptible to contamination because it has no mobile sections but closed surface. Thereby it is so reliable. Its small space requirement also makes it interesting for users who have little space at their disposal.

Easy Cat is:

- small, durable, comfortable
- easily handled and installed

For OEM customers we offer to customize the trackpad surface with the individual company logo.
