

## Custom-solution Keycaps

A keycap for every application for easy-use and higher security.

Every keyboard needs keycaps. As a keyboard becomes more specific, the keys become more specific as well.

GeBE can look back on many years of production of customer specific keycaps. We can therefore offer a large variety of existing shapes, colours, letters and symbols.

Beside the common used Cherry MX-Fittings, we can also offer fittings of other types on your request.

Colour-coding and special lettering makes using your keyboard simpler and safer.

### Examples:

- Maschine controls
- Infoterminals
- Point of sale Terminals
- Learning keyboards

### Pricing:

- One-time programming costs for layout.
- Setupcosts per lot.
- The price per piece depends on the quantity and the type of printing finish
