

## **Production of Customer-Specific Membrane Keyboards**

How are customer-specific membrane keyboards produced and what possibilities of customization are possible.

---

### **In which application fields are membran keyboards used today?**

- Mechanics
- Process Controll
- Measure technic
- Medical equipment
- Communication

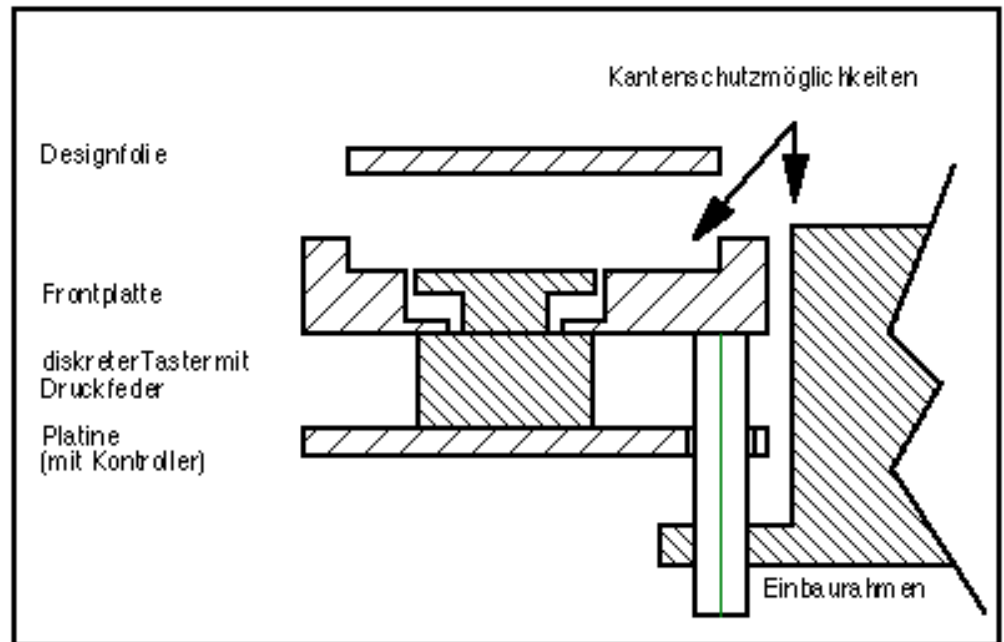

---

### **Where can be seen the advantages of membrane keyboards against other keyboard technologies?**

- Closed keyboard-cover (high seal-degrades concerning dust and water are possible)
- Very good chemical restistance because of properties of polyester and polycarbonat
- Freedom of design can be easily done
- 
- Favourable costs
- Very flat structure possible
- Simple integration of pouches, LEDs and displays and also Emergency-Off-Switches, [Touchpads](#) and [Trackballs](#).

---

### **Construction**
