GFT-51 Compact Keyboard integrated in a housing

Complete Standard Layout ideal for use in extremly cramped Application Areas.

Description

This USB desktop keyboard is ideal for use extremely cramped areas as well as for applications needing a separte mouse device for data input.

The keyboard covers the layout of a standard keyboard, with its compact size of 127 x 115 x 10 mm. The numerical and alphanumerical keys have individual RAL-colors to visually differentiate the input keys.

The GFT-51 is ideal for alphanumerical code inputs in industrial, medical or laboratory applications. The keyboard is dust- and waterproof according to IP 65. The metal dome key technology even allows a data input with gloves.

Features

- Membrane keyboard with USB interface. Available with integrated Touchpad
- Customized solutions concerning form, color and design
- Dust- and waterproof up to DIN IP 65
- The key mechanics of the GFT-51 is based on 9 mm metal dome including gold contacts
