## GTG-71 Silicone Mat

Silicone mat 71 keys, PC like layout,
optional Platine

---

**Description**

### Silicone mat

The silicone conductive mat of the series of GTG-71 has an alphanumeric layout
with 71 keys, like a standard PC keyboard. Beside the main key field a number
block and the cursor keys are separately arranged. The keyboard is very
compact. By the high-quality contact piles the keyboard is very reliable in
industrial applications. The key mat can be customized and also even in the
layout. To the basic features you find also further information in the overview of
the GTG-62 and GTG-71 product series at the bottom of this page in "catalog
cross reference ".

- Standard Windows layout

### The PCB

Suitably to the mat there is also a PCB ready for installation with integrated
controller. The controller is like the GCK-940 and can likewise be customized to
your needs.
