

GTL-105 Standard Keyboard with Touchpad in IP65

Description

Applications:

These keyboards can be used in virtually all fields, where a sealed keyboard is needed such as industry, medical and even standard office environments to protect against coffee and ashes.

Characteristics:

- The compact waterproof IP65 keyboard with integrated capacitive [Touchpad](#) relies on the latest economical developments.
- The keycaps are laser-engraved to prevent the wearing off of the inscriptions.
- Cables with both AT/DIN5 and [PS/2](#) interfaces are available.
- The Windows keys allow the user to call up various special Windows functions.
- Further language layouts are available on demand.
