

**GTS-105**

Standard keyboard with integrated lock.

**Description****Applications:**

These keyboards can be used in virtually all fields, where a keyboard is needed to prevent un-authorized personnel of tampering with the connected computer.

Especially suited for show rooms or any other highly frequented area, where the PC may not be under constant surveillance.

**Characteristics:**

- The keyswitch shuts off all power to the keyboard, which does not work until the power is turned on by the keyswitch.
- If the keyboard is shut off, a re-boot of the system is not possible, as the BIOS sends the error "no keyboard found".
- AT/DIN5 interface. [PS/2](#) is available on demand.
- The keyswitch can also be integrated into nearly any other keyboard of our program. Ask us for details.
