KVS-105 Rear

Rugged keyboard made of stainless steel for back panel mounting.

Description

This keyboard has the layout of a standard keyboard. In order to save room, the NUM-block was left out.

If the NUM-block is needed, there is another version of this keyboard which you can find HERE

Like the other keybords of the fullsize-range this keyboard is water- and dust proof to IP65 and has a good tactile feel due to the raised keycaps.

As frontpanel mounted version with integrated staybolts this keyboard can be easily integrated into an existing housing.

For further information you can go to the main page of this keyboard range.

Specification
