

**KVS-64**

Vandal resistant stainless steel keyboard  
as back panel mounted version.

**Description**

**This stainless steel keyboard offers substantial advantages to many other metal keyboards.**

This keyboard was designed for uses such as in modern point-of-information terminals.

**Special features:**

This vandal resistant keyboard has steel keys with a travel of 3mm that stand out of the frontplate. This makes this keyboard as simple to use as a standard PC-keyboard.

The keys are laser engraved and cannot be pulled out.

The keyboard is protected against the ingress of dust and water (IP65/NEMA4) and is therefore also suited for outdoor use.

The keyboard can be supplied in German, as well as in other language layouts. Please contact us to enquire the availability of your desired layout. Customer-specific layouts can be produced as well.

**Specification****Mechanical data**

Dimensions:	309,9 x 145, x 36, mm 120,2 x 80,2 x 45 mm
Degree of Protection:	IP65
Housing:	High-Grade Steel
Degree of Protection:	IP65
Housing:	High-Grade Steel
Cable Length:	150 cm, 180 cm
Ball Diameter:	38 mm
Ball Material:	Plastic

---

**Keys**

Key Technology:	membrane
