KVS-E90-Rear Touch

Rugged keyboard made of stainless steel with integrated touchpad for back panel mounting.

Description

This keyboard has an integrated Touchpad with 2 keys instead of the NUM-block. This saves alot of space and the touchpad is close to the rest of the keyboard.

If the NUM-block is needed, there is another version of this keyboard, that has the touchpad integrated instead of the arrow keys. You can find the other keyboard HERE

Like the other keybords of the fullsize-range this keyboard is water- and dust proof to IP65.

As back-panel mounted version this keyboard can be easily integrated into an existing housing.

For further information you can go to the main page of this keyboard range.
