KVS-E90 Table-top Version

The ergonomically designed stainless steel keyboard in a table-top housing.

Description

Modern design and extreme ruggedness all in one!

Up to now the stainless steel keyboards of this series were only available as mountable versions. This keyboard in a table-top housing can now be used just as a standard keyboard without having to mount it.

The riser on the back of the keyboard slants the keyboard towards the user, making it much more Ergonomic than any keybaord mounted flat into the desktop surface.

The sides of the keyboard can be ordered in one of the 8 standard colors:

Terracotta RAL 2010
Red   RAL 3000
Magenta   RAL 4003
Blue   RAL 5013
Silver   RAL 9006
Anthrazit RAL 9007
Black   RAL 7021

Keyboards can be ordered with customer specifically colored endcaps at no additonal cost beginning with 25 pieces.

In addition to the design aspects these keyboards are extremely robust. Just as one expects it of metal keyboards they are water and dust proof to IP65 and withstand even hard blows, so they can easily be used in areas prone to vandalism.

Since this keyboard has an integrated mouse no external mouse is required. This saves valuable desk space and keeps the keyboard dust- and waterproof.

For further information you can go to the main page of this keyboard range.

Specification

Stainless steel keyboard desk version with integrated
[Trackball](#)
