

NSQ-32

Numeric block with cursor keys

**Description**

The ideal supplement to a compact keyboard without numeric block and cursor keys, as they are available on a standard keyboard. The sturdy housing and the keyswitches with tactile feedback make the NSQ-32 ideal for:

- Mobile applications, since laptop keyboards have neither the middle key block with the cursor keys nor right numeric block.
- Left-handed persons, since this number block also contains the arrow keys which can be used with the left hand.
