

Silicone Mouse in IP68

Waterproofed Mouse with PS/2 Interface

Description

This mouse is a modified version of a standard computer mouse with optical sensor. It can be used like every other 'normal' mouse.

The special [Ergonomic](#) form guarantees an easy data input.

The mouse is coated with a compact silicone mass and therefore waterproof up to IP68.

Application Areas:

- The TW-2 Mouse is easy to clean and especially applicable in medical areas, hospitals or research centres.
- Furthermore, the special design enables the user even to work with gloves.

Specification

Mechanical data
