

Ultra Professional Optical R/C Mouse

The greatest mouse of all mice!

Description

Look here, no cables, no surface and no PC in sight!

The clou of this mouse is its gyroscope technology. With the help of the integrated gyroscope even the slightest movements in space are transferred to the PC.

Therefore it is possible to hold the mouse in one's hand and take care of the presentation and not worry about the cables or the operating surface.

The gyro is activated by pressing the trigger, so that not every movement is translated into a deliberate action.

With a reach of up to 30m there is no other like it.

Since the mouse comes with a power charging cradle, the batteries never need to be changed.

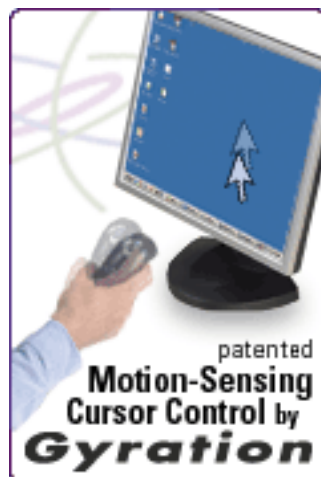

The mouse sends in 4 different frequencies and 65,000 addresses. Therefore it is possible to use multiple devices in one area.

The included presentation software offers over 75 different effects such as text markers, a virtual spotlight, or curtains that can be used with any program running on Windows 98SE, Me, 2K, or XP.

What's with the "optical"?

In additon to the gyro, the mouse also has an integrated optical module that allows the user to use the mouse as usual on a flat, table-top surface.

The cradle which is included in the package automatically loads the batteries of the mouse. Therefore no batteries are needed.

Specification

Mechanical data

Housing: Plastic ABS
 Degree of Protection: IP40
 Color: anthracite
 Dimensions: 122 x 51 x 45 mm
 Weight: 0,150 kg

Keys

Key Technology: short travel key
 Number of Keys: 3

Electric Data

Interface: [USB](#)
 Operating Voltage: 5 V

Environment

Operating Temperature: from +10 °C to +40 °C
 Storage Temperature: from -30 °C to +70 °C

Additional Information

Radio frequencies used: 40,669 / 40,675 / 40,687 / 40,697 MHz
 Operating distance: up to 30m

Order No.	Article
TI1006	30m Ultra Professional Optical Mouse Set
