W-Series with 30, 60 or 90 keys

Waterproof and free programmable keyboard with 30, 60 or 90 relegendarable keys. Table top version or build-in version.
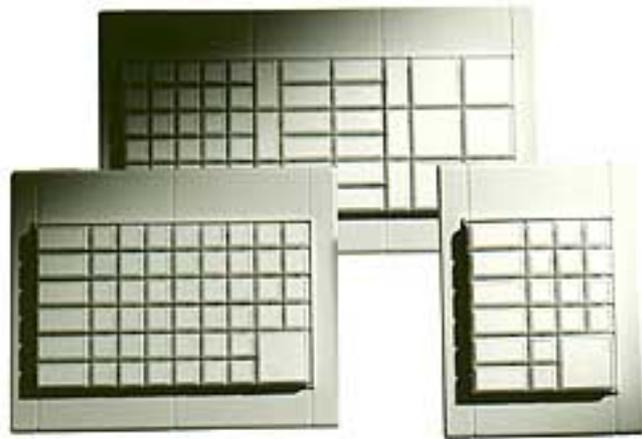

Description
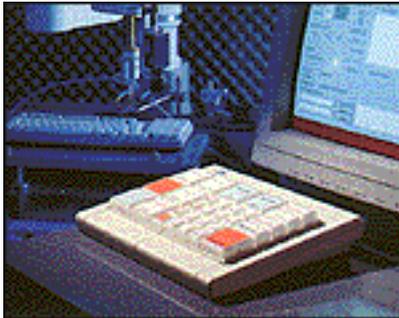

Degree of protection IP65 ensures that all contacts, electronic components and mechanical devices are protected from dust and water.

High typing comfort is achieved by long travel keys with tactile feedback.

All keys can be labeled individually, by inserting a lable between the key itself and the clear plastic cap that is supplied.

Special features:

- The long travel keys with a travel of 3.25mm and the good tactile feedback makes this keyboard very confortable to use.
- To adapt to the keyboard to the customer's needs, the single keys can be replaced by keys that cover either two or four keys. All keys can be labeled by inserting a lable between the key itself and the clear plastic cap, that is supplied.
- The keys are freely programmable.
- The keyboard emmulates a standard keyboard and is plugged into the AT / PS/2 interface of the PC. The encluded Teach program enables very easy programming of up to 16 characters per key.
- A serial version of each keyboard is also available. The keyboard then transmits ASCII to the RS 232 interface.

System requirements:

- 2 levels are available. Requirement: AT-compatible PC with DOS or Win95, 98, ME, 2000, and NT, colour screen and mouse.
