

X-Key Stick

The strip of 16 freely programmable
backlight keys!

Description

It's what the World has been waiting for. This [strip](#) of keys can be easily stuck onto a keyboard, monitor, or any other flat surface.

The [PS/2](#) version has a pass-through plug, so a standard keyboard can be connected as well.

The PS/2 version works without drivers. Both versions are programmed by teach-in "on the fly"

The stick is so compact, it fits into places, where the usual add-on keypad did not.

In the (home) office environment:

Applications:

- Addresses:
- User-names and passwords
- Text modules
- Gaming
- [Programming](#) strings

Industrial Purposes:

- F-keys, numbers, etc. directly on the monitor instead of a regular keyboard
-

Multimedia:

- Audio- videosystems

Specification**Mechanical data**

Dimensions: 364 x 23 x 18 mm
